

Codia AI FigmaMigrate

Seamless PSD to Figma Migration—Powered by AI

Unlock the true value of your legacy design assets.

Codia AI FigmaMigrate is the enterprise-grade migration platform built to help large organizations automatically convert thousands of Photoshop files into fully editable, structured Figma files. Say goodbye to manual work and hello to a faster, smarter design workflow.

Why Choose Codia AI FigmaMigrate?

- **Automated Bulk Conversion:** Convert hundreds—or even thousands—of PSD files at once. No manual effort required, just speed and scale.
- **High-Fidelity Output:** Our advanced AI-powered engine accurately preserves layer structures, text styles, naming conventions, and grouped components—so nothing gets lost in translation.
- **Design System Mapping:** Automatically match fonts, colors, and components to your existing Figma Design System for a consistent, on-brand outcome every time.
- **Support for Complex Elements:** Smart Objects, masks, layer effects? No problem. We retain all complex Photoshop elements with precision.
- **Enterprise-Grade Security:** With end-to-end encryption, SOC 2 compliance, and optional on-premise deployment, your data is protected at every step.
- **Robust API Integration:** Connect effortlessly with your internal systems, DAM platforms, and design pipelines—no workarounds needed.
- **Dedicated Migration Success Team:** Our enterprise support team partners with you throughout the entire migration journey—from planning to execution to validation.

Technical Capabilities

Feature	Supported
Layer structure preservation	✓
Smart object conversion	✓
Text and font recognition	✓
Style mapping (color/typography)	✓

Feature	Supported
Component grouping	✓
Vector and shape fidelity	✓
Private deployment options	✓
Figma team/organization import	✓

A Streamlined 4-Step Migration Process

Step	Description
1	<p>Assess Legacy Assets</p> <p>We analyze your PSD files to identify structures, patterns, and potential conversion challenges.</p>
2	<p>Secure Upload</p> <p>Upload your files in bulk via our enterprise portal, APIs, or direct integration with your asset management system.</p>
3	<p>AI-Powered Conversion</p> <p>Our proprietary engine delivers high-fidelity Figma files—layer by layer, style by style.</p>
4	<p>Design System Integration</p> <p>Converted files are automatically aligned to your Figma Design System to maintain brand consistency.</p>

Flexible Deployment Options

- **Cloud-Based:** Fast deployment without infrastructure overhead.
- **On-Premise:** Total control with self-hosted deployment for sensitive environments.

Security & Compliance

- SOC 2 readiness
- GDPR-compliant data handling
- Local processing option (run in your cloud or datacenter)
- Temporary file handling with automatic deletion after job completion

Who Is It For?

- Enterprises with 500+ legacy design files
- Organizations migrating from Photoshop to Figma
- DesignOps or creative leaders driving design system modernization
- Agencies supporting enterprise replatforming initiatives

Ready to Modernize Your Design Workflow?

Let Codia AI FigmaMigrate transform your design operations and accelerate your move to Figma.
